

In a time when broadcasters and the FCC should be working in concert, each helping the other to better serve their purposes, the current proposed mandatory recording are clearly at cross purposes.

Instituting greater burdens on any broadcaster makes no sense. Imposing these burdens on small market broadcasters is absurd. The time and people required to meet the demands would hamper our ability to serve our listeners. Someone has to be assigned the duty. That would take at least one of 8 full time employees. Who do suggest would do their job now that I have them working for the FCC. Because that is what your proposed rule amounts to.
